

FoamStar® SI 2210

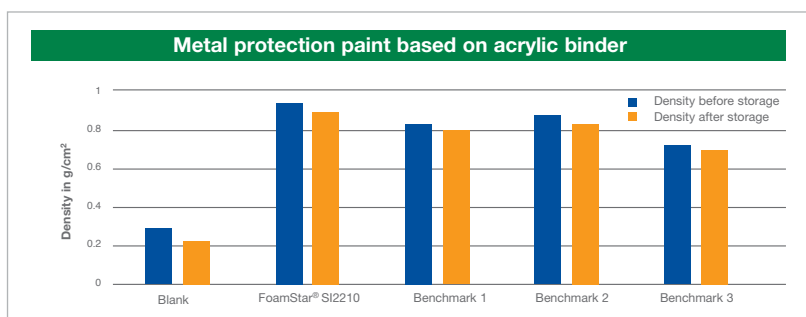

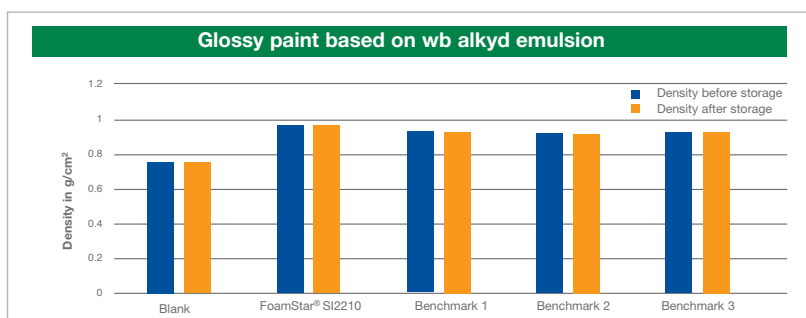

Very effective defoamer based on modified Polysiloxanes with good compatibility

FoamStar® SI 2210 is a very effective silicone based defoamer for glossy paints based on pure acrylic binders or alkyd emulsions.

Excellent results can be achieved in spray coating applications as well as in higher shear processes and as grind defoamer for applications, where a good compatibility is required. Additionally the product is also well suited for clear coats.

The graphs below show the performance of FoamStar® SI 2210 versus benchmark defoamers for density and storage stability in different systems.

FoamStar® SI 2210 allows the formulator to have superior foam control properties for emulsion paints.

FoamStar® SI 2210: Characteristic Values

Property	Value
Appearance	Clear to slightly hazy liquid
Solid content	~100%
Viscosity	75 mPa.s
Density	0.95 g/cm ³

Performance Highlights

- Excellent compatibility for high gloss applications
- Easy handling due to low viscosity
- Excellent long term efficiency

Sustainability Highlights

- Low VOC acc. to EU Ecolabel 2014/312/EU (<0.2%)
- Low odor
- No hazard labeling
