

# Rheovis<sup>®</sup> AS 1187

**Product description** Rheology modifier

- Key benefits**
- Highly effective rheology-control additive for use in a wide range of aqueous formulations
  - Particularly suitable for adhesives
  - Does not require neutralization
  - Equally effective over a wide pH range from 6 to 12

**Chemical nature** Sodium salt of an acrylic copolymer in an aliphatic hydrocarbon carrier

## Properties

**Physical form** White liquid

<b>Technical data</b>	Viscosity	ISO 2555	≤ 3.0 Pa.s
<b>(not supply specification)</b>	pH value	DIN EN ISO 976	~ 7.0

---

## Application

Rheovis® AS 1187 is recommended to be used in a wide range of aqueous formulations. The product is especially suited for adhesives. Typical applications include DIY adhesives, conventional industrial adhesives, construction adhesives, adhesives in the packaging and woodworking industries, pressure-sensitive adhesives and high-speed machine adhesives.

Rheovis® AS 1187 is equally effective over a wide pH range from 6 to 12. The product provides the rheological control effect by extensive swelling in the presence of water. It does not require neutralization.

### Formulation guideline

0.5 - 1.0 % on total formulation

The amount required for optimum performance should be determined in trials covering a certain concentration range.

Provided efficient mixing equipment is available, Rheovis® AS 1187 can be added directly to the formulation. It can be added at any step of the process. For easier handling, it can be pre-diluted with suitable solvents (aliphatic hydrocarbons) at a ratio of 1:2.

Rheovis® AS 1187 can also be diluted with water in order to form a pre-gel or stock solution at ~ 3% in water.

---

## Storage

Rheovis® AS 1187 is freeze-stable. However, it is recommended to store the product at temperatures above 5 °C to enable ease of handling and pourability. It is recommended to effectively stir the product before use.
