

FoamStar® ST 2439

Product description FoamStar ST 2439 represents a novel defoamer based on new defoamer chemistry. It is the first new defoamer chemistry in over 30 years. FoamStar ST 2439 defoamer is effective in high gloss paints and coatings based on acrylic, styrene acrylic and vinyl acrylic latex. FoamStar ST 2439 is also effective in alkyd emulsions.

Chemical nature Hyperbranched polymer with organo-modified silicones

Properties

Physical form Light yellow clear liquid

Technical data (not supply specification)	Active substance	%	100
	Dispersibility (10% in H ₂ O)		non- dispersible
	Viscosity	cps	~ 150 - 300
	Density	lbs/gal	~ 7.9 – 8.5

Applications

FoamStar ST 2439 has the following advantages:

- Does not reduce gloss of high gloss paints and coatings
- Effective in difficult to defoam high gloss formulations.
- Effective in low VOC systems
- Fast bubble-break versus conventional defoamers
- Effective against Microfoam
- Does not separate or settle
- Very good persistence

FoamStar ST 2439 is a defoaming molecule that defoams by a unique mechanism. Unlike conventional defoamers (mineral oil and silicone types), FoamStar ST 2439 defoams on a molecular level. It also has wetting properties not found in other conventional defoamers. FoamStar ST 2439 utilizes the FoamStar molecule compounded with polysiloxanes in a mineral oil-free system. FoamStar ST 2439 defoamer is very effective in defoaming high gloss paints based on acrylic and styrene acrylic latices.

Formulation guideline FoamStar ST 2439 can be used at levels of 0.25 % to 0.50 % based on total weight of paint depending on the individual paint formulation. FoamStar ST 2439 addition may be equally divided between the grind and let-down stages. Its effectiveness is the same in the grind and the let-down.

Storage

FoamStar ST 2439 is subject to appropriate storage under the usual storage and temperature conditions, our products are durable for at least 1 year. FoamStar ST 2439 is shipped in 55 gallon (200 liter) steel drums (400 lbs.) and plastic totes (1900 lbs.) and 5-gal pails (40 lbs.). If subjected to below freezing temperatures, product may congeal or stratify. Warm to room temperature and mix well before using.

FoamStar ST 2439 is classified as: Defoaming Compounds NOI.

Validity

This Technical Data Sheet is valid for all versions of the OBFoamStar ST 2439.

Safety

When handling this product, please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.

Note

The data contained in this publication are based on our current knowledge and experience.
