Rheovis® AS 1126

An efficient acrylic thickener (ASE) with pronounced pseudoplastic (low-shear) flow behavior for many aqueous paint and coating systems

Application:

Rheovis AS 1126 is an efficient acrylic thickener (ASE) with pronounced pseudoplastic (low-shear) flow behavior. It is recommended for many aqueous paint and coating systems

Sustainability Highlights:

- Low VOC
- Very efficient at low dosage
- Eco-label compliant
- Food Contact Compliant

Performance Highlights:

- Excellent thickening efficiency
- Pronounced pseudoplastic (low-shear) flow behavior
- Increased KU-viscosity
- Prolonged open time
- Reduced sagging
- Reduced syneresis during storage
- Excellent viscosity stability after tinting

Characteristic Values:

	Rheovis AS 1126
Appearance:	White liquid
Viscosity at 23°C [mPas]:	<= 10 mPa·s
pH value:	~ 2.8
Solid Content:	~ 25 %
