Rheovis® HS 1169 (MB)

Highly efficient and pre-neutralized low-shear HASE thickener

Application:

Rheovis® HS 1169 (MB) is a highly efficient HASE thickener with pronounced pseudoplastic (low-shear) flow behaviour for many aqueous paint and coating systems.
It is especially suited for interior paints, exterior paints, elastomeric coatings, textured finishes and wood coatings for brush and spray applications. It is especially recommended as co-thickener for spray applications.

Sustainability Highlights:

- Low VOC acc. to EU 2004/42
- Heavy-metal and APEO free
- Food contact compliance

Performance Highlights:

- Outstanding thickening efficiency
- Pronounced pseudoplastic (low-shear) flow behaviour
- Elongation of open time
- For partial substitution of cellulosics
- Excellent viscosity stability after tinting
- Lower water uptake
- Pre-neutralized

Characteristic Values:

	Rheovis® HS 1169 (MB)
Appearance:	White emulsion
Viscosity [mPas]:	~ 25
Solid content [%]:	~ 30
pH value:	~ 5
