

Attagel® 15

Attapulгите rheology modifiers for low-shear viscosity control

Application:

Attagel 15 is an economical, coarse particle-size attapulгите product that has high gel strength and a smooth texture with good spreading characteristics. Although Attagel 15 has a slightly higher residue than our other products, it is a cost-effective alternative in systems where high residue is acceptable.

Sustainability Highlights:

- Low VOC

Performance Highlights:

- Provide for easy application (especially spray application)
- Excellent storage stability and syneresis control in roof coatings, underbody coatings, driveway sealers and other asphalt cutbacks and emulsions

Characteristics Values:

| | Attagel 15 |
|----------------------------------|-------------------------------|
| Appearance: | Light Cream Pulverized Powder |
| Viscosity (7% clay in DI Water): | 3400 cps |
| pH: | 9.8 |
| Bulk Density (packed): | 51.5 lbs/ft ³ |
| Specific Gravity: | 2.4 |
