

Dispex® Ultra PA 4560

Dispersing agent for water-based industrial coatings and solvent-based colorants including NC lacquers

Application:

Dispex Ultra PA 4560 is a modified polyacrylate and high-molecular-weight dispersing agent that is pH-independent and has a wide-spread compatibility in most used waterborne decorative coatings. Dispex Ultra PA 4560 is, in combination with Dispex Ultra PA 4503, suitable to formulate Low VOC tinting concentrates for both water- and solvent-based decorative paints.

Sustainability Highlights:

- Tin-free
- BPA-free
- Low VOC

Performance Highlights:

- PH-independent; Broad compatibility
- Suitable for making resin-containing and resin-free pigment concentrates
- Improves gloss, color strength, and flocculation stability; anti-flooding behavior
- Water-based decorative and industrial coatings

Characteristic Values:

	Dispex Ultra PA 4560
Appearance:	Clear, slightly yellowish liquid
Active ingredients:	~ 40%
Density at 20 °C:	~ 1.04 g/cm ³
Solvent:	Water
Color:	< 6
