Foamaster® MO NDW NC and Foamaster MO NXZ NC

Standard Mineral Oil Defoamer

Application:

Foamaster MO NDW / NXZ are blends of mineral oils and nonionic surfactants and polymeric defoaming substances with global country registrations.

Both products are recommended for mid to high PVC decorative coatings, but also for adhesives.

Sustainability Highlights:

- Fulfills certain food contact compliances

Performance Highlights:

- Quick foam suppression
- Highly compatible
- Excellent long-term stability
- Broad applicability
- Very good price/performance ratio

Characteristic Values:

	Foamaster MO NDW / NXZ
Appearance:	Turbid amber liquid
Viscosity [mPas]:	~ 550/450
Density @20°C [g/cm³]:	~ 0.87
Flash Point [°C]:	>100
