Hydropalat® WE 3120

Non-ionic surfactant for water-based coatings

Application:

Hydropalat® WE 3120 is a low-foaming wetting agent and is recommended to be used in the formulation of aqueous paints, adhesives and printing inks.
It shows excellent reduction of surface tension.

Sustainability Highlights:

- Certain food contact compliance
- ECO label compliant
- Solvent-free
- Biocide-free

Performance Highlights:

- Fatty alcohol alcoxylate
- Excellent substrate wetting
- Strong reduction of surface tension
- Low foaming
- Water soluble

Characteristic Values:

	Hydropalat® WE 3120
Appearance:	Colorless liquid
Density [g/cm³]:	~ 0.956
pH value (1%):	~ 7
Cloud point [°C]:	~ 29.5
