Efka® PA 4400

A polymeric dispersant for stabilizing inorganic and organic pigments

Application:

Efka PA 4400 is a modified polyacrylate dispersant with significant higher molecular weight compared to Efka polyurethane-based polymeric dispersants. This results in improved deflocculation of organic pigments

Sustainability Highlights:

- APEO-free
- Tin-free

Performance Highlights:

- Reduces flooding problems
- Allows higher color strength
- Improved gloss and DOI

Characteristic Values:

	Efka PA 4400
Appearance:	Clear, slightly yellowish liquid
Active Ingredients:	~ 40 %
Flash Point:	24 °C
Density (60 °C):	~ 0.96 g/cm^3
Amine Value:	~ 42 mg KOH/g
Color:	≤ 4
