

Dispex® Ultra PA 4510

Dispersing agent for water-based industrial coatings and solvent-based colorants

Application:

Dispex Ultra PA 4510 is a modified polyacrylate that is recommended for use in all kinds of high quality waterborne industrial coatings. It can be used for both inorganic and organic pigments. This product is a high molecular weight dispersing agent for both inorganic and organic pigments. It should be neutralized for use in aqueous coatings.

Performance Highlights:

- Dispersing agent for both inorganic and organic pigments
- Suitable for high-quality water-based industrial and solvent-based coatings

Characteristic Values:

	Dispex Ultra PA 4510
Appearance:	Clear, slightly yellowish liquid
Active ingredients:	~ 50%
Density at 20 °C:	~ 0.91 g/cm ³
Solvent:	2-butanol
Color:	≤ 3
