

FoamStar® ST 2439

Effective defoamer in high gloss paints & coatings based on acrylic, styrene acrylic & vinyl acrylic latex

Application:

FoamStar ST 2439 is effective in high gloss paints and coatings based on acrylic, styrene acrylic and vinyl acrylic latex. It is a more potent version of FoamStar ST 2438.

Sustainability Highlights:

- Low Odor
- APEO-Free
- Low VOC

Performance Highlights:

- Effective in difficult to defoam high gloss formulations
- Effective in low-VOC systems
- Effective against micro-foam
- Very good persistence
- Does not separate or settle
- Does not reduce gloss of high gloss paints and coatings
- Fast bubble-break versus conventional defoamers

Characteristic Values:

	FoamStar ST 2439
Appearance:	Light yellow clear liquid
Viscosity:	~ 150 - 300 cps
Density:	~ 7.9 – 8.5 lbs/gal
Active substance:	100%
