Dispex® AA 4144 NW

Excellent dispersant properties and viscosity stability

Manufactured in Wyandotte, MI

Application:

- **Dispex AA 4144 NW** is a highly effective pigment dispersing aid for waterborne coating systems. It demonstrates exceptional compatibility with reactive pigments, co-solvents and binders

Sustainability Highlights:

- Low odor
- APEO-free

Performance Highlights:

- High viscosity suppression for TiO_2 in mid to high PVC paints and coatings
- Improved color acceptance and development
- Excellent gloss retention and good scrub resistance
- Excellent viscosity stability in storage
- Excellent cost/performance ratio

Characteristics Values:

	Dispex AA 4144 NW
Appearance	Slightly hazy colorless
Viscosity at 25ºC (Brookfield 30 rpm)	~ 150 cps
Density at 20°C	1.2 g/cm^3
Solid content	~ 35%

Internal
