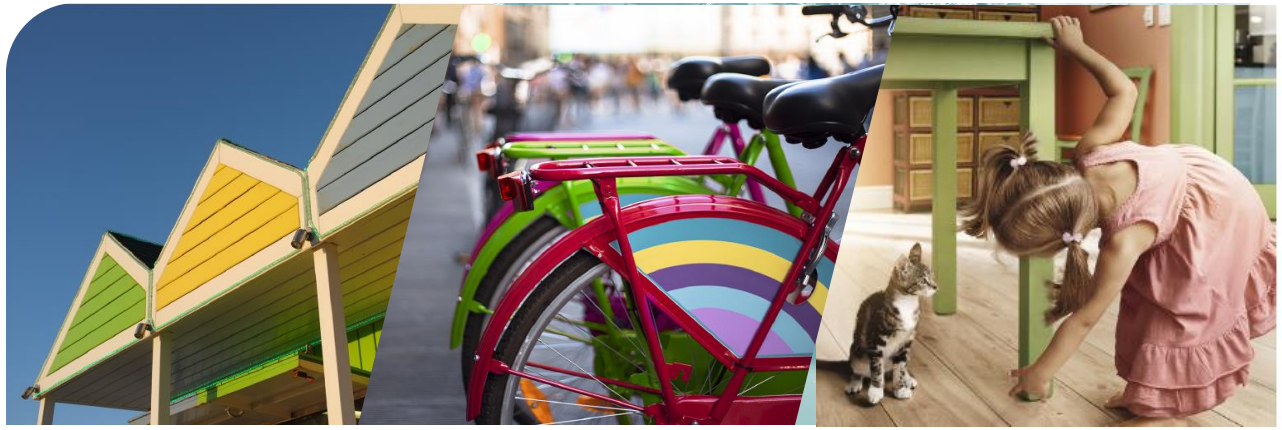
FoamStar® ED 2524

Highly-compatible, organo-modified, silicone emulsion-based defoamer



Application:

- To be used in a broad range of water-based paints and clear-coats based on:
  - Acrylic/PU
  - Vinyl acrylics
  - Pure /Styrene acrylic
  - Other
- For coatings processes such as brush, roller, curtain and dip applications
- Suitable for the multiple application areas e.g. Architectural, General Industrial, Wood coating

Sustainability Highlights:

- Water-based emulsion
- Does not contain mineral oils
- Low VOC
- Low odor

Performance Highlights:

- Easy incorporation
- Highly compatible in a broad range of binders
- Very effective for micro- and macro foam
- Good long-term defoaming efficiency
- Excellent storage stability

Characteristic Values:

	FoamStar® ED 2524
Appearance:	White emulsion
Active matter content [%]:	~ 27
Density at 20°C [g/cm^3]:	~ 1.00
Viscosity [mPa·s]:	~ 2.500 mPa·s
Flash point [°C]:	> 100 °C
