## Product Benefits

- Pharmaceutical grade ICH Q7 compliance
- Optimal particle size distribution for dissolution
- Utilized as primary ingredient in laxative formulations
- Can be used as an API or as an excipient
- Used as a matrix former and additive in topical and solid oral dose formulations
- Two available packaging sizes for your convenience

## The Preferred API for Laxative Formulations

BASF's Kollisolv® PEG 3350 is a high purity Active Pharmaceutical Ingredient (API) suitable for the treatment of chronic constipation. It is compliant with ICH Q7 GMP guidelines for APIs, adhering to high industry standards for quality. It is also used as a preparatory treatment for medical procedures such as colonoscopies, gastrointestinal surgery, and radiological exams. It is highly water soluble, tasteless, odorless, and safe to use in multiple dosage forms.

## Product Details

**Brand/Trade name** Kollisolv® PEG 3350 USP LAX

<b>PRD number</b>	30607816
<b>Article number</b>	50382493 50382494
<b>Packaging size</b>	816 kg supersack 91 kg fiber drum
<b>UNII number</b>	G2M7P15E5P
<b>Physical form</b>	Solid prill
<b>Chemical name</b>	Polyethylene glycol
<b>Quality (GMP)</b>	ICH Q7 GMP
<b>Monograph compliance</b>	USP
<b>CAS number</b>	25322-68-3
<b>Manufacturing site</b>	Geismar, Louisiana (USA)
