

# Dry n-3<sup>®</sup> 5:25 C

Microencapsulated fish oil rich in DHA

## Chemical name of active ingredient

Fish oil with a high content of docosahexaenoic acid (DHA)

## PRD-No.

30056967

## Article

50050099 25 kg bag in box

## Country of origin

Denmark

## Description

Light-yellow to light-beige, free-flowing, dry powder, consisting of spherical particles. The particles contain microencapsulated fish oil rich in DHA.

## Composition

Ingredients in descending order of weight: sucrose, fish oil, corn starch, caseinate, sodium ascorbate, tricalcium phosphate, tocopherol-rich extract, mono- and diglycerides, lecithin, ascorbyl palmitate.

## Solubility

Dispersible in cold water (approx. 10 – 15 °C), to form a milky emulsion with good long-term stability.

## Specification

|       |                               |
|-------|-------------------------------|
| Assay | DHA: min. 6.7 weight-%*       |
|       | EPA: max. 2.5 weight-%        |
|       | * calculated as triglycerides |

For further information see separate document: "Standard Specification" (not for regulatory purposes) available via BASF's WorldAccount: <https://worldaccount.basf.com> (registered access).

DHA (docosahexaenoic acid)

$C_{21}H_{31}COOH$

Molar mass 328.5 g/mol

EPA (eicosapentaenoic acid)

$C_{19}H_{29}COOH$

Molar mass 302.5 g/mol

## Regulations

The product meets the regulatory requirements for an omega-3 fatty acid source, especially DHA, in most countries. However, regulations on the ingredients used in the respective countries and for the intended use have to be observed.

## Bulk density

Approx. 0.6 g/ml

## Stability

The product is sensitive to air, heat, and light. Stored in its unopened original packaging at room temperature (max. 25 °C) in a dry place, the product is stable for at least 36 months. Once opened, it is recommended to use the remaining contents as quickly as possible.

## Storage/Handling

The product should be stored in the tightly sealed original packaging at room temperature (max. 25 °C) in a dry place.

### Food products:

The product is suitable for the fortification of basic food products, especially dairy-based powder products.

### Dietetic products:

The product is particularly suitable for the fortification of food and baby foods applications. Regulatory provisions for the use of tricalcium phosphate in the different product categories have to be considered. In the EU, the application in infant foods is limited to fortification with DHA and calcium. Further on in the application, maximum levels of sodium ascorbate have to be considered.

## Note

Dry n-3 5:25 C must be handled in accordance with the Safety Data Sheet.
