

Spongolit® 283 Kraft

PRD-No.

30530823

Articles

50208771* 20 kg multilayer paper bag with PE-lining

* This product is vegetarian, halal, kosher, gluten free

Country of origin

Germany

Description

White to yellowish powder.

Complex powder system consisting of emulsifier on a carrier system of glucose syrup and skimmed milk powder.

Used as an aerating emulsifier for the production of cakes.

Composition

Ingredients in descending order of weight:

Glucose syrup, lactic acid esters of mono- and diglycerides of fatty acids (E 472b), skimmed milk powder, polyglycerol esters of fatty acids (E 475).

Standards

All additives used in Spongolit® 283 Kraft comply with the current specifications established by the Joint FAO/WHO Expert Committee on Food Additives (JECFA) and the current EU Regulation laying down specifications for food additives.

Manufactured under ISO 9001 as well as HACCP methodology.

Specification

For further information see separate document: "Standard Specification" (not for regulatory purposes).

Storage conditions

The product should be stored at temperatures between 5 - 30 °C, in a dry place.

Shelf life

In its unopened original package under the mentioned conditions the product has a shelf life of 24 months.

Applications

Spongolit® 283 Kraft can be used as aerating emulsifier in cake applications, especially for sponge cakes, swiss rolls, pound cakes and muffins to improve cake volume, crumb structure, crumb moistness and texture.

Dosing

Using Spongolit® allows an all in method during manufacturing.

The dosage is depending on used flour quality as well as adding of further ingredients, preparation method (whipping times), used equipment (speed, energy input) and final cake quality expectations.

According to Regulation (EC) 1333/2008, the maximum levels of polyglycerol esters of fatty acids (E 475) in the final product have to be observed.

Recipes are available on request.

Summary

Spongolit® 283 Kraft is an aerating emulsifier which is applicable in a broad range of fat free as well as fat containing cake applications. It combines a medium to high cake volume with an elastic crumb structure in the final application.
