Sodium stearyl-2-lactylate

Country of origin

Malaysia

Description

White to beige powder.

Sodium stearyl-2-lactylate.

Used in bakery applications to achieve volume and improved antistaling effects.

Composition

Ingredients in descending order of weight:

Sodium stearyl-2-lactylate (E 481).

Standards

Prefera[®] SSL 6000 complies with the current specifications established by the Joint FAO/WHO Expert Committee on Food Additives (JECFA) and the current EU Regulation laying down specifications for food additives.

Manufactured under ISO 9001 as well as HACCP methodology.

Specification

For further information see separate document: "Standard Specification" (not for regulatory purposes).

Storage conditions

The product should be stored at temperatures below 20 °C, in a dry place.

Due to the fact that no anti-caking agent is added, lumping may appear; even under best handling and storage. Such lumps can easily be crushed and will not influence the product performance.

Shelf life

In its unopened original package under the mentioned conditions the product has a shelf life of 24 months.

Applications

Used in soft bakery applications, e.g. toast bread to improve volume, gain a fine and uniform crumb structure and extend shelf life properties.

Dosing

The recommended dosage of Prefera® SSL 6000 is 0.2 – 0.4 % based on flour weight.

According to Regulation (EC) 1333/2008, the maximum levels of sodium stearyl-2-lactylate (E 481) in the final product have to be observed.

Recipes are available on request.

Summary

Prefera® SSL 6000 can be applied in bakery applications to improve shelf life and product volume.
