Datem

Country of origin

EU

Description

White to yellowish powder with a weak acetic acid odor.

Datem on a carrier system of tricalcium phosphate. Used as an emulsifier for yeast raised products

Composition

Ingredients in descending order of weight:

Mono- and diacetyl tartaric acid esters of mono- and diglycerides of fatty acids (E 472e), tricalcium phosphate (E 341 (iii)).

Standards

All additives used in Emul 323 comply with the current specifications established by the Joint FAO/WHO Expert Committee on Food Additives (JECFA) and the current EU Regulation laying down specifications for food additives.

Manufactured under ISO 9001 as well as HACCP methodology.

Specification

For further information see separate document: "Standard Specification" (not for regulatory purposes) available via BASF's World Account: <https://worldaccount.basf.com>

Storage conditions

The product should be stored at temperatures below 20 °C, in a dry place.

It is not recommended to stack pallets on each other to avoid lumping.

Shelf life

In its unopened original package under the mentioned conditions the product has a shelf life of 18 months.

Applications

Application in yeast raised products to obtain products with higher volume and equal crumb structure, e.g. baguette, white bread, crispy rolls.

Dosing

The recommended dosage of Emul 323 in yeast raised products is 0.2 – 0.5 % based on flour weight.

Detailed recipes are available on request.

Summary

Emul 323 is a high esterified Datem offering best product performance in bakery applications.
